

Tereza Britta Švanda

PRODUCT & UX/UI DESIGNER

brittasvanda@gmail.com · 0160 098432749

95652 Waldsassen, Germany · Portfolio · LinkedIn

I connect the logic of design systems with the empathy of a creative maker, turning research into interfaces that stay structured, human and developer-ready.

SKILLS

Core: UX research, prototyping, usability testing, design systems

Tools: Figma, Affinity Suite

Frameworks/Platforms: HTML/CSS, Angular, GitHub

AI-assisted design and frontend workflows

SOFT SKILLS

Attention to detail · Clear communication · Cross-functional teamwork

LANGUAGES

Czech: native
German: professional working proficiency
English: professional working proficiency

DRIVING LICENCE

Class B

EXPERIENCE

FEB 2025 –
PRESENT
INDEPENDENT
WORK

Selected design work for Praut

PRODUCT, BRAND & COMMUNICATION

Visual identity, product communication and web interfaces; shaping a shared design system and collaborating with development to make concepts ready to build.

- Concept and design for modern websites, landing pages and communication assets
- Design system covering colour, typography and reusable components
- Developer-aware collaboration and AI-assisted workflows

PROJECTS

Enow: Stress-management app

IRONHACK BOOTCAMP · TEAM OF 2 · 2026

Designed a stress-management app for parents of young children, for a fictional client, The Daily Health Conference.

- Owned the full visual identity, including the name, logo, and brand style, and built a teammate's SOS concept into a complete hands-free SOS flow and onboarding.
- Iterated the SOS trigger across three testing rounds into a flow triggered hands-free, by lock-screen widget or voice.

Spotify: Solo UX/UI redesign

IRONHACK BOOTCAMP · SOLO · 2026

Redesigned Spotify's mobile app, working solo from a personal starting point: chromesthesia, the ability to see color in music.

- Ran a full heuristic evaluation and competitive analysis, identifying an unclosable mini-player, a chaotic library, and unreadable icons as the core issues.
- Designed a genre-and-mood colour system rooted in chromesthesia, applied consistently across the interface as the fix.

Figma · [Case study](#)

Galerie Venek: Gallery website (client project)

IRONHACK BOOTCAMP · TEAM OF 3 · 2026

Designed the first-ever website for Galerie Venek, an independent outdoor contemporary art gallery in Karlovy Vary, with a real founder instead of a fictional client.

- Brought the team up to speed on the local market and helped shape the persona and journey map that surfaced the gallery's core problem: no website meant no trust.
- Owned the workshop-enrollment flow and "What's on" page end-to-end, fixing issues found across two rounds of usability testing.
