What we expect from you

Quick Recap

CV is all about **who you are**:

- Contact: name, target role, email, city/country, portfolio/GitHub link
- Summary (About Me formula): who you are + your strongest value + the role you're targeting
- Experience: action verb + what you did + tool used + quantified result
- Projects: Action → Technology/Process → Result, plus a live link
- Education
- Skills, grouped by category
- Languages (CEFR scale: A1–C2)

[CV checklist](#)

LinkedIn is all about connections, activity and especially **keywords**:

- Headline: Role + Top Skills/Keywords + Value proposition, front-loaded
- About: Hook → Proof → Close
- Featured: your 2–3 strongest projects, pinned
- Experience (same formula as your CV)
- Education & Licenses/Certifications — courses go here
- Skills: pin your top 3 to match your target role
- Open to Work + location + Recommendations

Tab 1

Headings you add to the document will appear here.

Please make a copy of this document before using it.

This is a checklist that summarizes the main points you need to have in mind for your CV.

Make sure you already applied all of them before scheduling your 1:1 session or sending it to your career advisor 🧐

Tasks	Status
Make sure you use standard section headings—no tables, columns, text boxes, or icon-only skill bars—and keep it to one page (two pages only if you have 8+ years of experience)	In progress
Picture: only necessary for some markets.	Done
Use the file naming convention <code>FirstName_LastName_CV.pdf</code> .	Not started
Contact details: Full name + email + phone number + LinkedIn + Other important hyperlinks, as the portfolio + City, Country (NO ADDRESS). - Availability (optional): immediately. - Never display: date of birth, nationality, complete address, gender or document numbers.	Done

location.

Ask for at least 1–2 short, specific recommendations from a mentor, a bootcamp instructor or teaching assistant, or a former colleague. This is extremely valuable.

Not started

Summarise your work experience & education through 3-5 bullet points:

Not started

- Focus on your accomplishments, not so much on the job description or responsibilities.
- Add the personal skills you acquired that are key to your new target role.
- When possible, try to “translate” your job description in terms of your target role. Think about transferable skills.
- These descriptions can be wider and include more details that you consider add value, different than your CV, which is straightforward.
- When possible, add media.

Organize the skills section

Not started

- Link each one of your skills with your experiences.
- Ask your Ironhack classmates and network to endorse you.

Projects Section

Botanical Hack

Sep 2023 - Sep 2023

 Associated with Ironhack

Botanical Hack is my final collaborative project at Ironhack, and it's a full-stack web application designed to help users search for various plants and access their detailed information. This project involves both frontend and backend skills and was developed to provide an aesthetically pleasing web user experience. It includes features such as authentication, a review section, and the ability to add plants to a wishlist, making it useful for plant enthusiasts, gardeners, or anyone interested in learning more about different plant species.

Key Features:

- User authentication and login system.
- Search for plants and access their specific information.
- An account and login are required to view more details about each plant, leave reviews, and add plants to a wishlist.

Technologies used:

- React.js for the front-end experience
- Express.js for dynamic content rendering
- MongoDB for scalable data storage
- Postman for testing routes
- JavaScript
- CSS
- Material UI and Joy UI for customizing and designing the interface

Skills: JavaScript · React.js · Express.js · Node.js · Postman API · Material-UI · MongoDB

REMEMBER THIS

IRON
HACK

Project → Action → Technologies → Result.

Every project entry should answer: what did you build, how, and what happened because of it?

Activity: Which Project Description Is Stronger?

Instructions

Read the project descriptions below and decide:

Which one would have a bigger impact on a recruiter? Why?

Example 1

A- Built a machine learning model to predict customer churn.

B- Developed a customer churn prediction model using Python and Scikit-Learn, achieving 85% accuracy and identifying key customer retention factors through data analysis.

Example 2

A- Created a website for a restaurant.

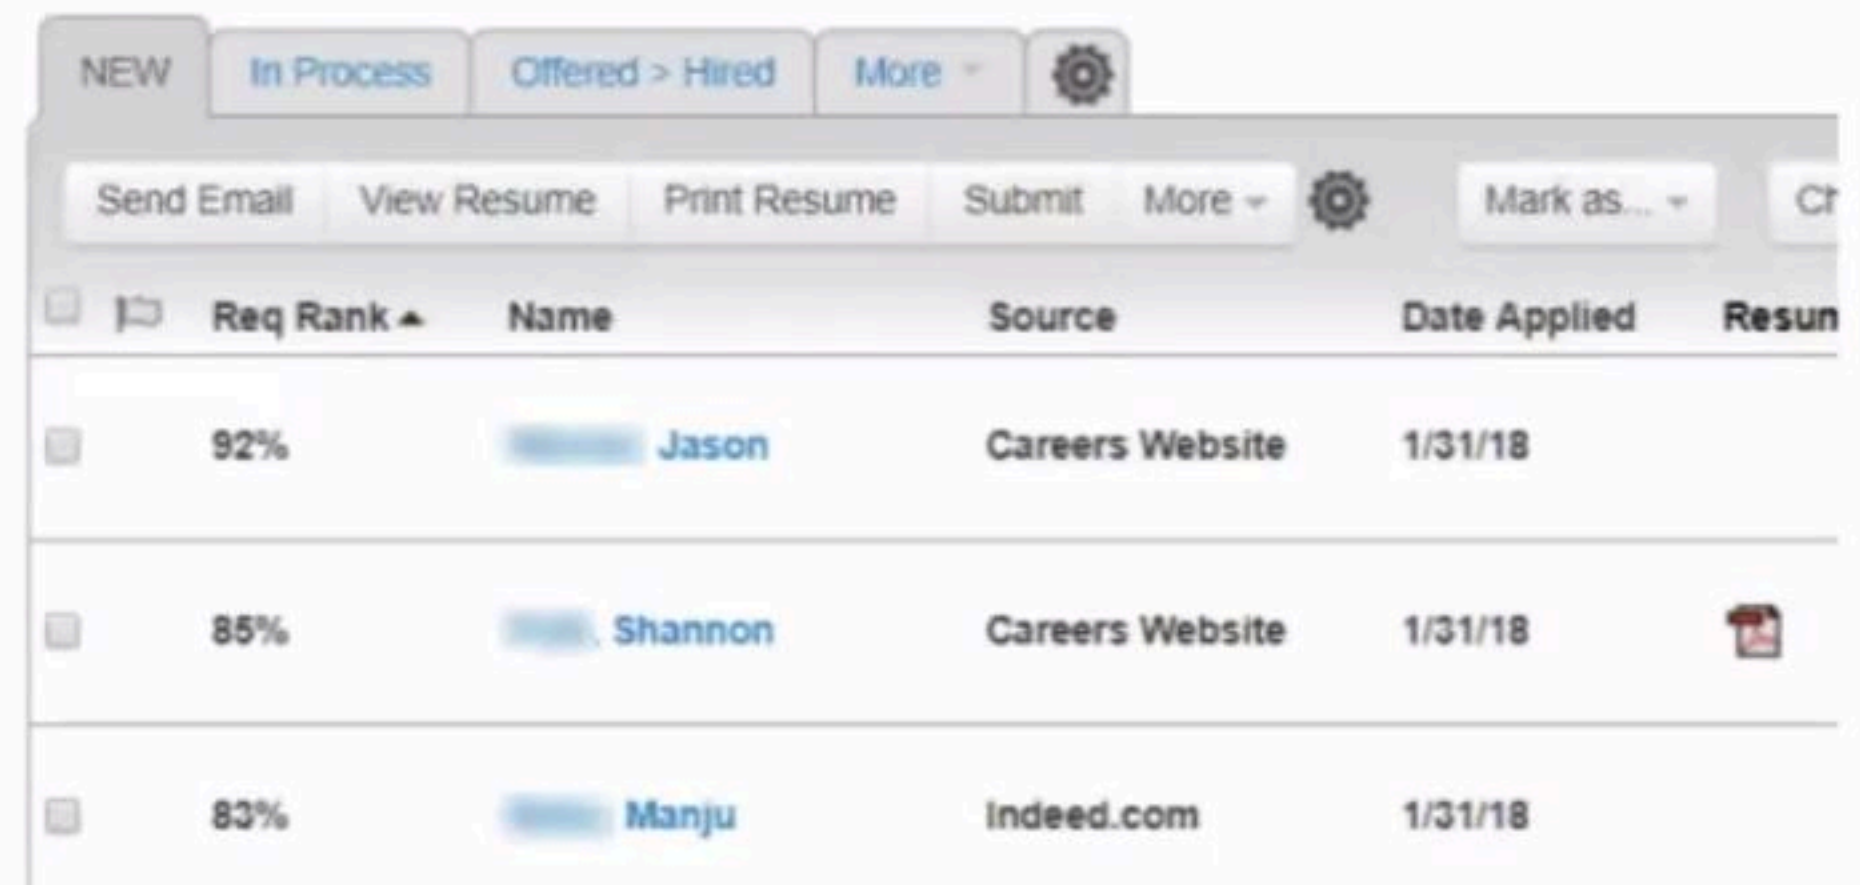

B- Designed and developed a responsive restaurant website using React and CSS, featuring an online reservation system and mobile-friendly user experience.

Job Application – ATS

The ATS (Applicant Tracking System) is artificial intelligence that uses an algorithm to **filter resumes on a platform.**

This helps the recruiter to:

- Optimize their time
- Reduce biases
- Deliver recruiter the candidates that best fit with the position.

The screenshot shows a web interface for an Applicant Tracking System (ATS). At the top, there are tabs for 'NEW', 'In Process', 'Offered > Hired', and 'More'. Below these are action buttons: 'Send Email', 'View Resume', 'Print Resume', 'Submit', 'More', and 'Mark as...'. The main area is a table with columns: 'Req Rank', 'Name', 'Source', 'Date Applied', and 'Resun'. Three candidates are listed: Jason (92% rank, Careers Website, 1/31/18), Shannon (85% rank, Careers Website, 1/31/18), and Manju (83% rank, Indeed.com, 1/31/18). Each row has a checkbox on the left and a small icon on the right.

	Req Rank ▲	Name	Source	Date Applied	Resun
☐	92%	Jason	Careers Website	1/31/18	
☐	85%	Shannon	Careers Website	1/31/18	
☐	83%	Manju	Indeed.com	1/31/18	

REMEMBER THIS

IRON
HACK

Most modern ATS (Workday, Greenhouse, iCIMS, Lever) organize and rank for a human recruiter — very few silently auto-reject a resume outright.

The real bottleneck is usually application volume, not a robot gatekeeper.

Job Application – ATS

How to win the game

Match the Keywords

Mirror the exact terms from the job posting (skills, tools, job title), using both the full term AND its acronym, e.g. "Machine Learning (ML)."

This is the heaviest-weighted factor: most ATS rank primarily on literal keyword overlap.

<https://skillsyncer.com/>
<https://www.resumecoach.com/>
<https://www.jobscan.co/>
<https://enhancv.com/>

Format to Get Parsed 🙄

Standard section headings, no tables, columns, text boxes, or graphics. A poorly-configured ATS can drop entire sections or scramble your contact info if the format isn't simple.

Tailor Per Application, Not Once 🛠️

Keep a complete Master CV, but adjust the top keywords for each specific application. The same generic CV sent to 20 postings scores lower on each one than a tailored version – this ties directly into the Master CV → Tailored CV workflow already used in the CV lesson.

ATS – Best Practices:

- Use an ATS-friendly resume template
 - [Novoresume](#)
 - [Resume-Now](#)
- Use standard section headings
 - Contact Information, Summary, Work Experience (or Work History), Education, Projects, Skills, etc
- **Customize your resume with the right keywords**
 - **Tailor it to the specific job description**
- Use full acronyms and titles
 - Machine Learning – ML or “Chief marketing officer (CMO)” or JS instead of JavaScript
- Test it yourself: paste your CV into a plain-text editor — if it still reads clearly, you’re safe
- Check your spelling and grammar
- Follow Up with the employer
- Don’t let the ATS cause you to forget the human touch

Write an **About section** for LinkedIn of a Fullstack Developer in a career change. Have a CTA in the end and take into account some information about me:

- 4 years of experience as Content Marketing Specialist;
- Just took a Web Development bootcamp at Ironhack where I've learned Javascript, React, Node.js, Express.js, MongoDB;
- I'm a people-oriented person;
- I was good at Maths in high school;
- I'm looking for an opportunity to work for a company with social impact.

Result

Hello, and welcome! As a Fullstack Developer with a passion for making a difference, I bring a unique perspective to the field. With 4 years of experience as a Content Marketing Specialist and a recent completion of a Web Development bootcamp at Ironhack, I have developed a strong skill set in Javascript, React, Node.js, Express.js, and MongoDB.

As a people-oriented person, I prioritize collaboration and communication to ensure that the projects I work on are successful. I have always enjoyed Mathematics, which has given me a solid foundation for problem-solving and critical thinking in my development work.

I am now seeking an opportunity to work with a company that has a social impact. I believe that technology can be a force for good, and I am passionate about using my skills to contribute to projects that make a difference in the world.

If you are looking for a Fullstack Developer who can bring a unique perspective and make an impact, please do not hesitate to reach out. I would be thrilled to discuss how my skills and passion can contribute to your organization.

Projects Section

Botanical Hack

Sep 2023 - Sep 2023

 Associated with Ironhack

Botanical Hack is my final collaborative project at Ironhack, and it's a full-stack web application designed to help users search for various plants and access their detailed information. This project involves both frontend and backend skills and was developed to provide an aesthetically pleasing web user experience. It includes features such as authentication, a review section, and the ability to add plants to a wishlist, making it useful for plant enthusiasts, gardeners, or anyone interested in learning more about different plant species.

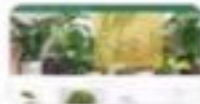

Key Features:

- User authentication and login system.
- Search for plants and access their specific information.
- An account and login are required to view more details about each plant, leave reviews, and add plants to a wishlist.

Technologies used:

- React.js for the front-end experience
- Express.js for dynamic content rendering
- MongoDB for scalable data storage
- Postman for testing routes
- JavaScript
- CSS
- Material UI and Joy UI for customizing and designing the interface

Skills: JavaScript · React.js · Express.js · Node.js · Postman API · Material-UI · MongoDB

REMEMBER THIS

IRON
HACK

Project → Action → Technologies → Result.

Every project entry should answer: what did you build, how, and what happened because of it?

Activity: Which Project Description Is Stronger?

Instructions

Read the project descriptions below and decide:

Which one would have a bigger impact on a recruiter? Why?

Example 1

A- Built a machine learning model to predict customer churn.

B- Developed a customer churn prediction model using Python and Scikit-Learn, achieving 85% accuracy and identifying key customer retention factors through data analysis.

Example 2

A- Created a website for a restaurant.

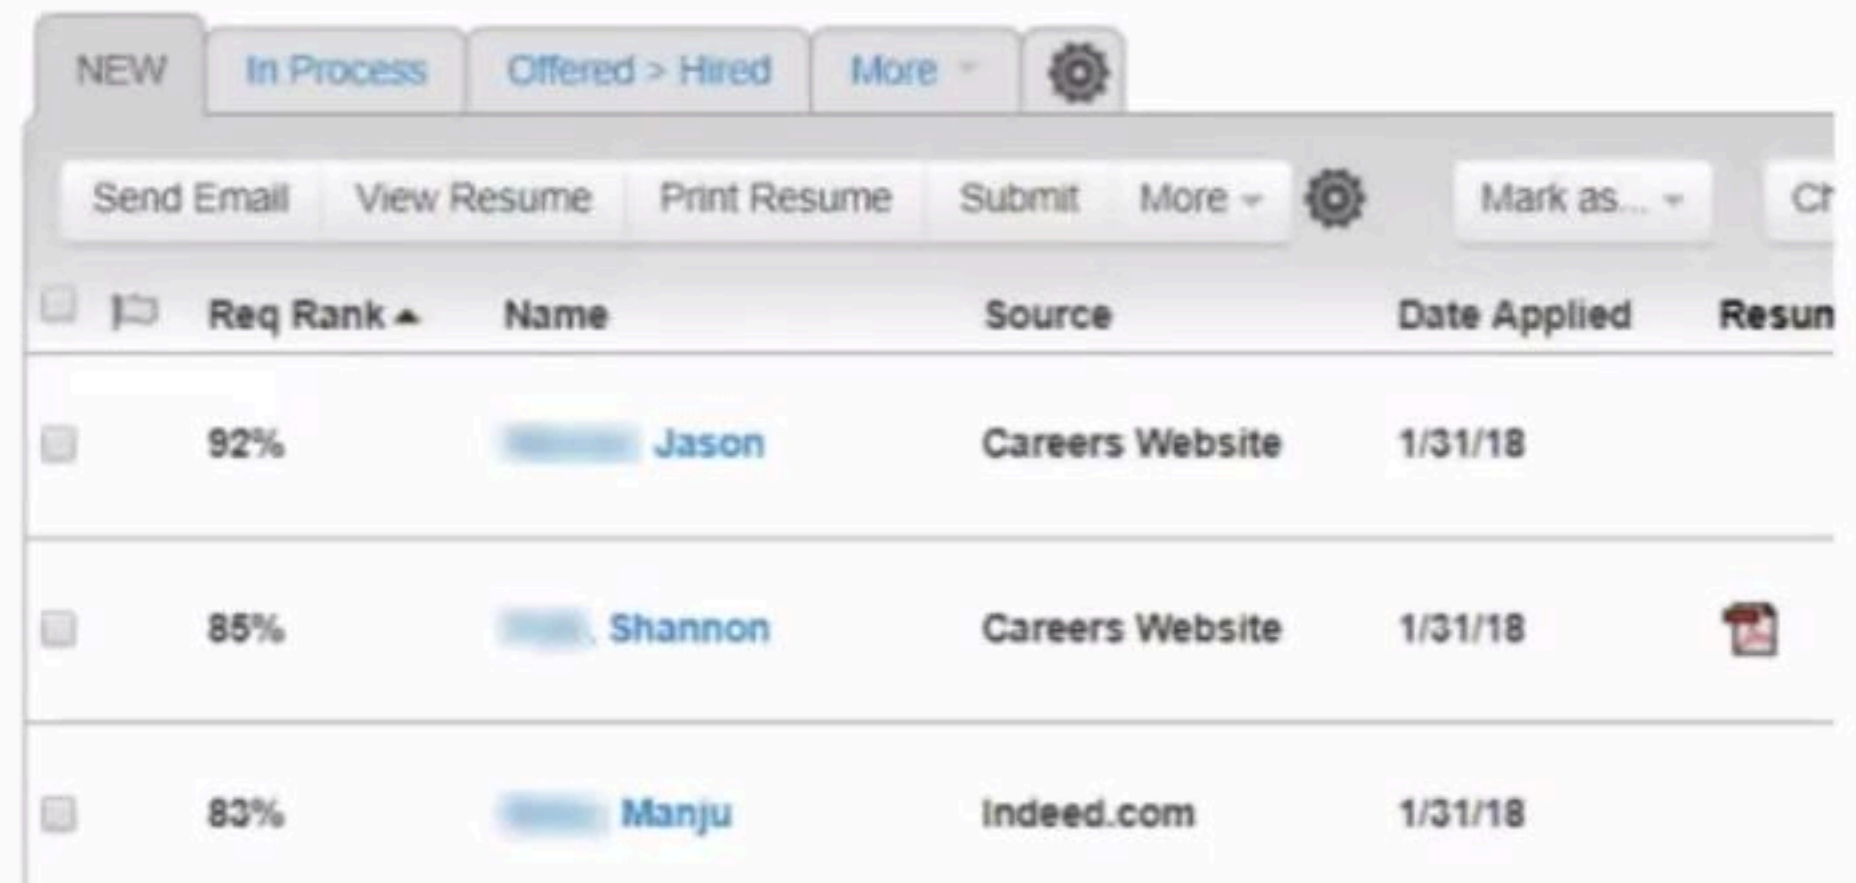

B- Designed and developed a responsive restaurant website using React and CSS, featuring an online reservation system and mobile-friendly user experience.

Job Application – ATS

The ATS (Applicant Tracking System) is artificial intelligence that uses an algorithm to **filter resumes on a platform.**

This helps the recruiter to:

- Optimize their time
- Reduce biases
- Deliver recruiter the candidates that best fit with the position.

The screenshot shows a web interface for an Applicant Tracking System (ATS). At the top, there are tabs for 'NEW', 'In Process', 'Offered > Hired', and 'More'. Below these tabs is a row of action buttons: 'Send Email', 'View Resume', 'Print Resume', 'Submit', 'More', and 'Mark as...'. The main area is a table with columns: 'Req Rank', 'Name', 'Source', 'Date Applied', and 'Resun'. The table contains three rows of candidate data.

	Req Rank ▲	Name	Source	Date Applied	Resun
☐	92%	Jason	Careers Website	1/31/18	
☐	85%	Shannon	Careers Website	1/31/18	
☐	83%	Manju	Indeed.com	1/31/18	

REMEMBER THIS

IRON
HACK

Most modern ATS (Workday, Greenhouse, iCIMS, Lever) organize and rank for a human recruiter — very few silently auto-reject a resume outright.

The real bottleneck is usually application volume, not a robot gatekeeper.

Job Application – ATS

How to win the game

Match the Keywords

Mirror the exact terms from the job posting (skills, tools, job title), using both the full term AND its acronym, e.g. "Machine Learning (ML)."

This is the heaviest-weighted factor: most ATS rank primarily on literal keyword overlap.

<https://www.jobscan.co/>
<https://enhancv.com/>

Format to Get Parsed 🙄

Standard section headings, no tables, columns, text boxes, or graphics. A poorly-configured ATS can drop entire sections or scramble your contact info if the format isn't simple.

Tailor Per Application, Not Once 🛠️

Keep a complete Master CV, but adjust the top keywords for each specific application. The same generic CV sent to 20 postings scores lower on each one than a tailored version – this ties directly into the Master CV → Tailored CV workflow already used in the CV lesson.

ATS – Best Practices:

- Use an ATS-friendly resume template
 - [Novoresume](#)
 - [Resume-Now](#)
- Use standard section headings
 - Contact Information, Summary, Work Experience (or Work History), Education, Projects, Skills, etc
- **Customize your resume with the right keywords**
 - **Tailor it to the specific job description**
- Use full acronyms and titles
 - Machine Learning – ML or “Chief marketing officer (CMO)” or JS instead of JavaScript
- Test it yourself: paste your CV into a plain-text editor — if it still reads clearly, you’re safe
- Check your spelling and grammar
- Follow Up with the employer
- Don’t let the ATS cause you to forget the human touch

Get help from ChatGPT or Claude

Write an **About section** for LinkedIn of a Fullstack Developer in a career change. Have a CTA in the end and take into account some information about me:

- 4 years of experience as Content Marketing Specialist;
- Just took a Web Development bootcamp at Ironhack where I've learned Javascript, React, Node.js, Express.js, MongoDB;
- I'm a people-oriented person;
- I was good at Maths in high school;
- I'm looking for an opportunity to work for a company with social impact.

Result

Hello, and welcome! As a Fullstack Developer with a passion for making a difference, I bring a unique perspective to the field. With 4 years of experience as a Content Marketing Specialist and a recent completion of a Web Development bootcamp at Ironhack, I have developed a strong skill set in Javascript, React, Node.js, Express.js, and MongoDB.

As a people-oriented person, I prioritize collaboration and communication to ensure that the projects I work on are successful. I have always enjoyed Mathematics, which has given me a solid foundation for problem-solving and critical thinking in my development work.

I am now seeking an opportunity to work with a company that has a social impact. I believe that technology can be a force for good, and I am passionate about using my skills to contribute to projects that make a difference in the world.

If you are looking for a Fullstack Developer who can bring a unique perspective and make an impact, please do not hesitate to reach out. I would be thrilled to discuss how my skills and passion can contribute to your organization.

WHY PERSONALIZING MATTERS MORE THAN DETECTION

**Many hiring managers say they can spot unedited,
generic AI writing almost immediately.
Let AI draft it — but only you can personalize it.**

NEXT STEPS

Next steps

- 1 Review Workshop content and Careerhack content:
 - CV/Resume
 - LinkedIn profile
- 2 Work on your profiles
- 3 Submit your profiles
 - Assessment: Resume
 - Assessment: LinkedIn

Next steps

- 4** Ask for a profile review from your Career Advisor
- Assessment: Resume
 - Assessment: LinkedIn

- 5** Apply the feedback

Deliverables 1 & 2

- ☐ Resume
- ☐ LinkedIn

Resume

4. Submit your ATS CV/ resume with one drive link (**review the "share" permissions to allow us to "view" it**) and make a request to your Student Success Manager for review. Be sure you submit your CV/ resume by the end of the following dates at the latest:

- Tuesday of week 10 for Full-time students
- Tuesday of week 25 for Part-time students

 [Request for revision](#)

Important notes before submitting your request:

- If your CV/ resume doesn't fit the minimum requirements mentioned in this [checklist](#), your Career Coach won't review it.
- We will review your CV/ resume a maximum of 2 times, so make sure that after receiving the feedback, you apply the recommended improvements and thus take advantage of all the tips your Career Coach gives you.
